

pcvisit 4 Quick Steps

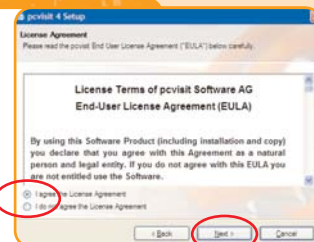

Connection SetUp:

SetUp:

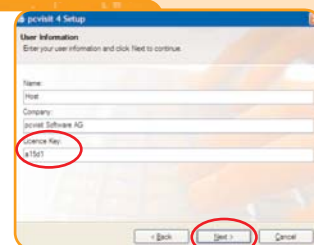

Start by double-clicking on **setup**
Accept license agreement.

Click **Next**.

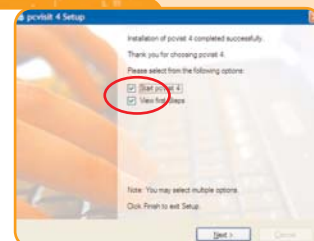

Enter license key.

Click **Next**.

Select from the given choices.
Multiple choices possible.

Click **Next**.

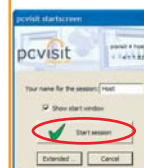

Host

Double-clicking on:

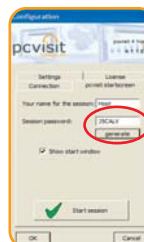

pcvisit-Session without password:

Click **Start session**.

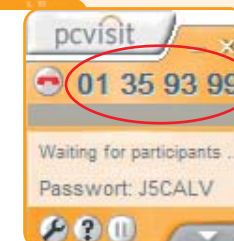

pcvisit-Session with password:

Click **Extended** and enter the password you have chosen or have generated in the **pcvisit startscreen**. You can choose a new password for each session.
Click **Start session**.

Assign the eight-digit connection number to the guest.

If you selected a password, communicate it to your session partner afterwards.

Features:

Guest

Start the guest module:

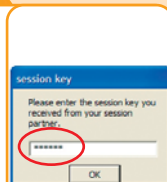

<http://www.pcvisit.com> or:

Enter the connection number and click **Start session**.

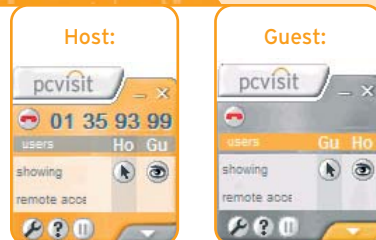

pcvisit-session with password:

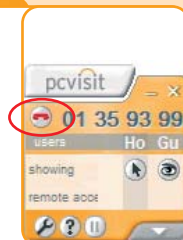

Enter password in separate window and click **OK**.

The connection has been established.

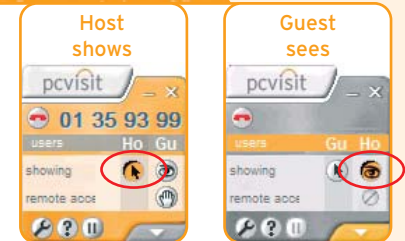

Break connection.

Set the viewing direction

👁 = show; 👁 = see; to choose, click on the icon, the change of viewing direction is carried out only with the permission of the "showing person".

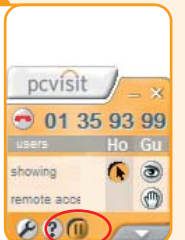

Mouse pointer

To point out something during a session on session partner's screen. Click left mousekey - mouse pointer flashing.

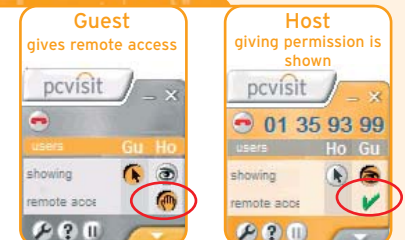

Pause

"Freeze" screen, for example to quickly work on another document. The session partner only sees the screen contents from the beginning of the pause.

Remote access*

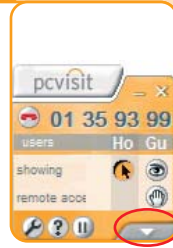

Give remote access rights with click on hand-button.

Other features:

Menu selection

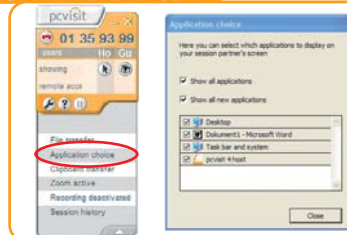

Click here to select file transfer*, application choice, clipboard transfer*, zoom, recording* & session history*.

Orange blinking button: files or clipboard are ready for download.

Application choice

Choose which applications should be shown (possible to limit to single documents or applications).

Zoom

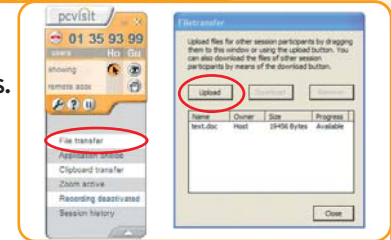

To optimize the pcvisit transmission on the screen.
Zoom active: display scaled.
Zoom inactive: original resolution and screen of the showing person.
Select by mouse click.

File transfer*

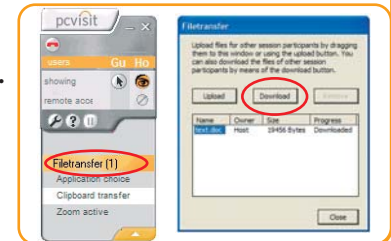

Exchange file(s) between pcvisit meeting partners. Make file available:

File transfer, click **Upload**, select file or pull by drag&drop to the module.

Blinking menu selection - session partner is informed about file being provided for download.

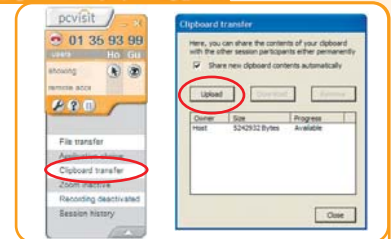

File transfer, click on file to select. Click **Download**. File is saved on desktop.

Clipboard transfer*

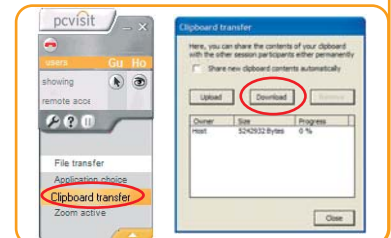

Transfer information from clipboard to session partner.

Mark text to be transferred and copy to clipboard (strg+c or right mouse button+copy)
Clipboard transfer, click **Upload**.

Clipboard is available for the session partner. Blinking menu selection.

Mark the desired "Clipboard" in the window and click **Download**. Paste clipboard in text, on desktop etc. (strg+v or right mouse button+paste).

Session history*

Detailed information about each pcvisit-session as for example date, time, session-partner etc.

Click **Session history** or open the xml-file **Session history** over the program folder.

Flash Recording*

Recording of pcvisit-session in flash-format.

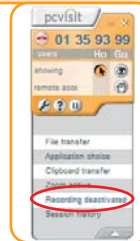

Start recording:

Click on **Recording inactive** to switch to **Recording active**.

File is saved in program-folder.

Play record via links in **session history**.

(Browser and up to date Flash-Player necessary).

3rd Member*

A session is created in the same manner as with the first guest.

Hand over session: Host may select to pass on session to guests or end session by clicking on the red telephone receiver.

* Not available in all versions.
